

Please do not attack the Indiana Telephone Privacy. With it in place, I have been able to enjoy time with my friends and family without exceptionally rude and inconsiderate telephone calls from people trying to soliciate me and harrassing me when I do not want thier services. If I wanted to inquire or were interested in thier business I would contact them. I am sure they, in return, would not like to be harrassed or bothered when they are trying to enjoy time at home.
